DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 65-68, 70, 76 and 78 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims or those dependent thereon, teach that the MSMA-based compound have the structure taught therein, while applicants specification teaches that the MSMA-based compounds are the partial monoesters of these structures. The application has been examined with respect to these partial monoesters as taught in the specification. Appropriate correction of the claims is required.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1712

4. Claims 81 and 82 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 81 and 82 depend from cancelled claim 83.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 45 and 48 are rejected under 35 U.S.C. 102(b) as being anticipated by Morway (2332247).

Morway teaches a composition which comprises an organic liquid and salts of multifunctional fatty acids (cottonseed fatty acids) with Barium and aluminum metals (see examples).

7. Claims 45 and 48 are rejected under 35 U.S.C. 102(b) as being anticipated by O'Halloran (2959548).

Art Unit: 1712

O'Halloran teaches a composition which comprises an organic liquid and salts of multifunctional fatty acids (cottonseed fatty acids) with lithium and calcium metals (see examples).

8. The other references cited in notice of references of this office action are considered relevant to claims 45 and 48, but are not used in a rejection in order to avoid repetition.

9. Claims 46, 47 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

10. Claims 37-44, 49, 51, 52, 53, 55-64, 69, 71-74, 77, 79, 85-92 are allowable over the art of record.

11. Applicants amendments have overcome the rejections in the previous office action. New rejections are presented in this action.

Art Unit: 1712
